

ANDRÉ ALBERTO DE ANDRADE PEREIRA

Senior Specialist in Networks, Telecom and Critical Infrastructure

Phone/WhatsApp: (19) 9293-9543 | LinkedIn: [linkedin.com/in/andre-pereira-80846941](https://www.linkedin.com/in/andre-pereira-80846941)

EXECUTIVE PROFILE

Senior Information Technology and Telecommunications professional, with a career that began in 1993 and strong hands-on experience over the last decade in carrier environments and critical infrastructure. Brings practical expertise in IP/MPLS networks, optical transport, access networks, servers, identity, security and observability, with a hands-on profile focused on implementation, recovery, troubleshooting and stabilization of complex environments.

Experienced in dynamic routing analysis, route control and preference, logical segmentation, Layer 2 and Layer 3 VPN services, gateway redundancy, high availability, loop prevention in switched networks, WAN connectivity and integration between IP networks and optical transport. Practical experience in multivendor environments with routers, switches, DWDM, OLT and ONU/ONT, combined with strong fault analysis and root cause capabilities.

CURRENT PROJECT - FUMEC | INFRASTRUCTURE + TELECOM INTEGRATION

- Infrastructure built from the ground up: deployment of the server environment and supporting services on Proxmox, Linux and Windows, including Samba/Active Directory, DNS, LDAP, FreeRADIUS, PostgreSQL, NetBox/IPAM, VPN, Syslog, backup and monitoring.
- Centralized identity and authentication: Active Directory/LDAP + FreeRADIUS integration for controlled access to routers, switches and OLTs, as well as LDAP authentication for corporate applications and frontends.
- Operational observability: development and evolution of AD Replication Mission Control in Zabbix/Grafana, consolidating health, services, resources and operational auditing for 19 servers into a centralized view.
- DWDM environment recovery: restoration of management access after administrative credentials were lost, including reset/reconfiguration of the management board and creation of new secure access.
- Technical support for the backbone: analysis of incidents and failures involving routers and other network elements, supporting diagnosis, root cause analysis and solution proposals for the professional responsible for backbone configuration.

TECHNOLOGIES APPLIED IN PRACTICE

Networks / Service Provider

BGP, OSPF, MPLS, VRF, IPVPN, L2VPN/L3VPN, HSRP, VRRP, GLBP, VLAN, Spanning Tree, Layer 2/3, SD-WAN, VPN IPsec, LAN/WAN.

Optical / Access

DWDM, optical ring networks, OLT, ONU/ONT, integration between optical transport, access and IP services.

Infrastructure / Identity

Proxmox, Linux (Ubuntu/CentOS), Windows Server, Active Directory, Samba4, DNS, LDAP, Kerberos, FreeRADIUS, PostgreSQL, NetBox/IPAM, VPN, Syslog and backup.

Observability / Security

Zabbix, Grafana, Power BI, FortiGate, FortiAnalyzer, FortiCloud and Trend Micro.

Vendors

Huawei, Cisco, Fortinet, HP, Dell, Extreme Networks, Ubiquiti and TP-Link.

PROFESSIONAL EXPERIENCE

3CORP | Oct/2025 - Present

Senior Network Analyst (Contractor) - FUMEC Project

- Design and deployment of the server infrastructure supporting Telecom operations, integrating identity, authentication, database, monitoring, VPN, logging, IPAM and backup services.
- Implementation of centralized authentication with Active Directory/LDAP and FreeRADIUS for routers, switches and OLTs, as well as LDAP integration with corporate frontends.
- Development of observability with Zabbix and Grafana, including the Mission Control dashboard for monitoring infrastructure health, services, resources and operational auditing.
- Recovery of DWDM environment management and participation in backbone incident analysis, supporting troubleshooting and technical recommendations.

Azza Telecom | 2024

IT, Development and Telephony Coordinator

- Management of a multidisciplinary team of 17 professionals across IT, development and telephony.
- Creation of operational dashboards in Power BI and leadership of customer-service automation initiatives using WhatsApp Blip and CRM/Telephony integration.
- Work on critical connectivity and addressing incidents, including DHCP/MAC analysis and service restoration.

CTI Renato Archer | 2022 - 2023

Senior Network Analyst

- Connectivity project for autonomous robots in an innovation environment using Ubiquiti and TP-Link solutions.
- Diagnosis and correction of critical routing failures, remediation of the FortiGate environment and deployment of outdoor Wi-Fi.

Globalhitss / Embratel | 2014 - 2022

Network Analyst

- Operations and troubleshooting in carrier IP/MPLS networks, with practical work on BGP, OSPF, VRRP, HSRP, GLBP, redundancy and IPVPN services.
- Delivery of IPVPN projects for large financial institutions, including Banco do Brasil and Itaú.
- Implementation and support of SD-WAN solutions and FortiGate 100E environments in critical corporate networks.

TIVIT | 2011 - 2013

Mid-Level Support Analyst - PwC Project

- Administration of Windows Server 2012 and Active Directory, including infrastructure monitoring and operational follow-up.

EDUCATION, CERTIFICATIONS AND LANGUAGES

Education	MBA in Logistics Management - Faculdades Fleming COC (2009) Postgraduate Degree in Business Management - Faculdades Fleming COC (2008) Bachelor's Degree in Business Administration (Systems Analysis) - Faculdades Fleming COC (2005)
Certifications	Oracle Cloud Infrastructure Foundations Associate Fortinet NSE 1 & NSE 2 Network Security Associate
Languages	English: intermediate reading and writing basic conversational proficiency

Experience prior to 2011: IT career started in 1993; detailed history available upon request.
